SKILLS

- **Languages:** C++, JavaScript, C, PHP, Java, Python
- **Frameworks:** HTML and CSS, NodeJS, React, Laravel
- **Tools/Platforms:** Git, GitHub, AWS EC2, Ubuntu, WordPress, Figma, REST APIs
- **Soft Skills:** Problem-Solving, Team Collaboration, Adaptability, Communication

EXPERIENCE

- **Freelancer.com** | [Profile](#) Since Mar, 2019
 - *Freelancing*
 - Delivered 15+ responsive websites for small and medium businesses, improving loading speed and UI consistency.
 - Enhanced user engagement through **modern layouts and performance optimization**.
 - Collaborated directly with clients to gather requirements, plan features, and deliver polished final products.
 - Worked with **AWS EC2, Ubuntu, LEMP, WordPress, and Figma** to deploy and manage client solutions.

PROJECTS

- **Dynamic Job Location Tracker:** | [github](#) Dec, 2025
 - Developed a **full-stack role-based** web application using ReactJS, NodeJS, Express, and MongoDB, enabling Job Seekers, and Recruiters to register, authenticate (JWT), and access dedicated dashboards.
 - Implemented **real-time geolocation tracking** and integrating the Geolocation API with a custom proximity-based **Search & Filter Engine** to deliver highly relevant job based on location, experience, and industry.
 - **Built secure and scalable backend services** including RESTful APIs for job posting and applications, added **email-based OTP password reset workflows**.

Tech Stack: ReactJS, NodeJS, MongoDB, JWT, RESTful API, Geolocation API
- **Agricultural Farmers eCommerce Website:** | [github](#) Apr, 2025
 - Built a **full-stack eCommerce platform** tailored for farmers, enabling them to browse and purchase agricultural equipment with a smooth and mobile-responsive user interface.
 - Integrated **real-time weather data APIs** to provide farmers with instant location-based weather insights, improving decision-making during product selection and enhancing the overall user experience.
 - **Implemented a dynamic checkout module** that securely stores user information and automatically pre-fills customer details during future purchases, reducing friction and improving transaction efficiency.

Tech Stack: HTML, Tailwind CSS, JS, PHP, MySQL, APIs

Training

- **CyberSecurity by CipherSchools:** Jun, 2025
 - Trained in **network security, cryptography, ethical hacking, OWASP Top 10, MFA, RBAC, intrusion detection, DoS/DDoS prevention, and secure authentication mechanisms**.
 - Built a **Brute Force Attack Simulation Tool**, implementing password-cracking algorithms, analyzing password complexity, and evaluating mitigation techniques such as lockout thresholds and hashing
 - Performed practical security assessments using **Nmap, OWASP ZAP, Zphisher**, and network sniffing techniques, enhancing skills in vulnerability scanning, phishing simulation, and web application security testing
- **Cyber Security v/s Ethical Hacking by Secuneus:** Nov, 2023
 - Gained practical exposure to **networking fundamentals, IP addressing, port scanning, and vulnerability identification**, developing a strong foundation in how cyber-attacks operate at a beginner level.
 - Performed hands-on simulations to understand **real-world attack vectors** and how fundamental security practices help protect systems against common threats.

CERTIFICATES

- The Bits and Bytes of Computer Networking – Coursera | [Certificate](#) Nov, 2024

ACHIEVEMENTS

- Completed 32+ real world project as freelancer.
- Implemented JWT-based auth & real-time geolocation tracking.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
 - *Bachelor of Technology - Computer Science and Engineering; CGPA: 7.32* Since Aug 2023
- **Saraswati Vidya Mandir** Munger, Bihar
 - *Intermediate; Percentage: 66%* Apr 2020 - Mar 2022
